Stephen,

I'm happy to report that the remaining two servers on the AAR were delivered to ITIM and the hard drives were degaussed three times. Additionally, I followed up with Jonathan on replacing the old UPSs with the new ones.

Regards,

Chris

Chris,

This is fantastic news. Great work to all parties on closing the final recommendation from the incident after action report.

In your service,
Stephen.

Fellas,

I will arrive at the center around 1:30 today to pick up the old DC. I will also get the old unioi server from secure storage. Additionally, I sent in a service ticket for this request.

Regards,
