CDC Admits COVID-19 did not Cause 94% of Reported Deaths Director has 28 Year History of “Scientific Misconduct”

ATLANTA GA – On July 24th, a team of eight doctors released a [report](#) on COVID-19 deaths for [Children’s Health Defense](#), the organization founded by Robert F. Kennedy Jr. to end childhood health epidemics. The report concluded the Center for Disease Control (CDC) changed its fatality reporting procedures only for COVID-19. The doctors found that with **CDC’s standard fatality reporting practices COVID-19 deaths are actually 90% lower than what CDC reported.**

The report specifically noted, among other stunning findings, that:

- “Had the CDC used its industry standard, *Medical Examiners’ and Coroners’ Handbook on Death Registration and Fetal Death Reporting Revision 2003*, as it has for all other causes of death for the last 17 years, the COVID-19 fatality count would be approximately 90.2% lower than it currently is.”

By August 30th, the CDC admitted Children’s Health Defense doctors were correct. **CDC’s own [report](#) showed 94% of CDC declared COVID-19 deaths were for patients who tested positive but had other primary causes of death.** Thus, true COVID-19 fatalities are actually about 6% of over 200,000 reported.

Current CDC Director Robert Redfield began a pattern of deceptive reporting in 1992. As a U.S. Army Lt. Col., **Redfield overstated GP160 test results to help an AIDS vaccine maker** while speaking at Amsterdam and Anaheim conferences. The U.S. Air Force International Review Subcommittee found: **“The information presented by Dr. Redfield seriously threatens his credibility as a researcher”**. They alleged **“unethical behavior”** in their October 23rd [report](#) [pg 9]. An October 21st [report](#) from Maj. Craig Hendrix and Col. Neal Boswell to Col. Donald Burke accused Redfield of **“misleading or, possibly, deceptive presentations”** and sought to **“censure Dr. Redfield for potential scientific misconduct...”** [pg12].

In 1994, government watchdog group, Public Citizen, sent a [letter](#) to Rep. Henry Waxman seeking a Congressional investigation. Instead of being fired, Redfield was promoted to Colonel and retired in 1996. **In 2018, Alex Azar, head of the Dept. of Health and Human Services, appointed him CDC Director despite the fraud that should have ended his career.** Redfield and the CDC now have no more credibility than the World Health Organization that repeatedly downplayed the impact of the virus when it originated from a Wuhan, China laboratory.
